

California Topography and Geomorphic Provinces

Lambert Conic Conformal Projection

Legend

- Geomorphic province boundary
- International boundary
- State boundary
- Permanent river or canal
- Intermittent river
- City, state capital
- City, pop. 1+ million
- City, pop. 1/2-1 million
- Peak, elevation in meters
- Lake or reservoir, elevation in meters

Elevation above sea level

14000	5000
8000	4000
4000	2000
2000	1000
1000	500
500	250
200	100
0	0
Depression	
0	0
-5000	-2000
-10000	-4000
-15000	-6000

To convert meters to feet, divide the metric figure by 0.3048

J. S. Salonen 2007 - Created using Generic Mapping Tools software (P. Wessel and W. H. F. Smith) and SRTM30 Plus topography data (J. J. Becker and J. T. Sandwell). Geomorphic provinces are presented according to California Geological Survey Note 36.
